

RODIP CHETTRI

Product Designer

Gurugram, India | +91 8637-317431 | hirerodipuix@gmail.com | [Behance](#) | [LinkedIn](#)

SUMMARY

I turn business requirements and messy user journeys into scalable, production-ready products, and I close the gap between design and engineering instead of leaving it for someone else to figure out. 4+ years owning design systems, tightening design-to-dev handoff, and shipping consistent, brand-aligned experiences on deadline. I'm looking for a team that wants that ownership from day one.

SKILLS & TOOLS

Skills	User Research, User Interviews, Information Architecture, User Flows, Wireframing, Prototyping, Interaction Design, Usability Testing, Design Systems, Design Handoff, Cross-Functional Collaboration
Tools	Figma, FigJam, Framer, Webflow, Zeplin, Maze, Jira, Adobe Photoshop, Adobe Illustrator
AI Integration	AI-assisted design workflows (Claude, ChatGPT, Cursor, GitHub Copilot), prompt-driven ideation, secondary research, and design-to-dev handoff documentation

EXPERIENCE

Product Designer | [Matchbest Software Pvt. Ltd.](#)

Jan 2026 – Present

- Fragmented handoff between design and engineering was slowing releases. Led the end-to-end design process from requirements gathering to production-ready UI, cutting implementation gaps and speeding up developer handoff.
- Inconsistent UI patterns across products were creating rework. Built and maintained a shared design system and style guide, standardizing components and improving design-to-dev consistency portfolio-wide.
- Complex, multi-step user journeys were causing drop-off. Simplified flows through clearer interaction patterns and scalable interface solutions, improving usability across core journeys.

UI/UX Designer | [Images Multimedia Pvt. Ltd.](#)

Mar 2025 – Jan 2026

- Campaign visuals lacked consistency across large-scale industry events. Designed unified digital experiences and branded assets, keeping presentation consistent across web and event platforms.
- Tight campaign timelines risked delivery quality. Delivered marketing and digital assets on schedule while maintaining brand consistency across channels.

Jr. UI Designer/Developer | [Franchise India](#)

Aug 2023 – Mar 2025

- Low usability and unclear navigation were hurting engagement. Redesigned key website flows with responsive layouts and intuitive navigation, improving overall usability.
- Research insights weren't reaching production. Translated findings into wireframes and prototypes, keeping final designs grounded in real user needs.
- Cross-team misalignment risked accuracy. Partnered closely with developers to verify design feasibility, ensuring accurate implementation and brand consistency across platforms.

Jr. UI Designer/Developer | [Entrepreneur Media](#)

Jul 2022 – Aug 2023

- Design intent was getting lost in handoff. Built responsive interfaces from concept to production using HTML, CSS, and Bootstrap, closing the gap between design and implementation.
- Usability issues were surfacing post-launch. Ran usability testing and incorporated feedback pre-release, reducing issues shipped to production.

LIVE PROJECTS

- [Matchbest Software](#)
- [Maverick Services](#)
- [W3 Summit](#)
